

2023

SPONSORSHIP PACKAGE

IEEE OKANAGAN STUDENT BRANCH

UBCO IEEE

THANK YOU!

For your interest
in sponsoring our
organization!

In this package you will find information about us, as well as our sponsorship system & its tiers.

ABOUT US

The IEEE Okanagan student chapter is made up of UBCO students with all different educational backgrounds. What brings us together is our common passion for tinkering, and providing a fun yet safe workspace on campus. Our Hackerspace office is constantly staffed and ready to help our campus community!

WHAT WE DO

01

Hackerspace Project Consulting

We use our knowledge and resources to advise & troubleshoot the projects of engineering students.

02

Workshops & Events

Our most recent was a PCB workshop, where we instructed engineering & computer-science students on the fundamentals of PCB design & creation.

03

Student Projects

Some highlights of student projects that were developed in the space include a functional robotic arm, coil launcher, and a series of general engineering projects for various courses.

Hackerspace Services

Learn more about any of our services listed below by clicking on the corresponding hyperlink, or by going to our website, ubcoieee.org.

[Hackerspace Screen Installation Service](#)

[Hackerspace 3D Printing Services](#)

OUR VISION & VALUES

In the IEEE Okanagan chapter, we provide space, equipment, components, and guidance for students to work on their personal engineering-related projects. We summarize our core values as:

Student
Support

Personal Project
Facilitation

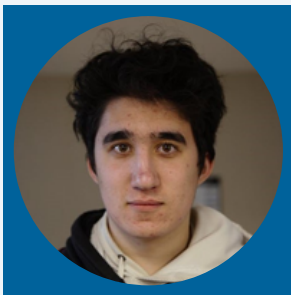

Hard Skill
Development

Professional
Development

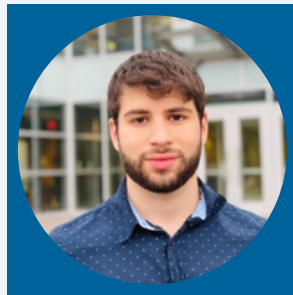

WHY PARTNER?

By sponsoring the IEEE Okanagan student branch, your organization is showing its support for movements that aim to benefit students and their learning. Additionally, as a sponsor you will have access to an elite talent pool of students who frequent the Hackerspace. Finally, our club will champion and promote our sponsors wherever appropriate.

FUNDING GOALS

Funding received will be used to increase the prowess of our Hackerspace office, this could include purchasing electronic/mechanical components or new equipment. We are currently looking into solder reflow stations, and 3D printing components.

All remaining funding will be used for on campus events including Industry nights and workshops, or used to expand our club services.

OUR TIERS

	Contributor	Supporter	Benefactor	Patron
	\$0 - \$500	\$501 - \$2000	\$2001 - \$3500	>\$3500
